

## **NATURAL STONE & CONCRETE**

### **PROTECTION**

Water and oil repellent protection for slate, granite, marble, natural stone, ceramic cement board, kitchen, bath. Arita Natural Stone & Concrete is a water based protection for both indoors and outdoors. Protects surfaces against water and oil damages. Easy cleaning and long-lasting effect.

---

Arita Natural Stone and Concrete protection is the latest technology in water and oil repellent. Protect slate, granite, marble, natural stones, terracotta, ceramic, and concrete surfaces against water and oil penetration. Arita Natural Stone and Concrete can be used on new and existing surfaces indoors and outdoors.

Arita Natural Stone and Concrete does not change the texture or gloss of the surface. Active protection against stains from coffee, red wine, oil and water.

**AREAS OF USE:** Slate, granite, marble, ceramic, tile, natural stone, sandstone, travertine, terracotta, and polished and smooth concrete surfaces.

**INSTRUCTION FOR USE:** Clean the surface and allow to dry. For removing fungi and algae before applying, use Arita Mold and Fungus remover. Apply Arita Natural Stone and Concrete with a brush, roller or a low-pressure sprayer. For extra protection on porous surfaces, extra application can be made within max 30 minutes after the first application. Any excess liquid on the surface must be wiped off with a lint-free rag that is slightly moistened with Arita Natural Stone and Concrete. Full effect is seen 2 days after application. Always test on a small area before full scale application.

**CONSUMPTION:** 14-20 m<sup>2</sup>/L

**FEATURES:** White, water based emulsion. The product is ready to use and must not be diluted. Does not change the texture or colour of the surface after curing. May cause some colour change on natural stone. Can be used both indoors and outdoors. Can be used on new or old surfaces. Store frost-free. Clean tools and equipment with water after use.

**SAFETY:** The impregnation is a health and environmentally friendly product. When spraying in confined spaces, use of dust mask and safety glasses is recommended. Keep out of reach of children. In case of contact with skin and eyes, rinse with water. If swallowed, seek medical advice.

**HAZARDOUS INGREDIENTS:** No dangerous additives under Regulation 1907/2006 REACH.
